# ECOTENCEL

This range of articles is based on ecologic materials.

Derived from nature, Lyocell and Modal fiber have been certified as compostable and biodegradable thus they can fully revert back to nature.

TENCEL™ Lyocell fibers have a reputation for their environmentally responsible closed loop production process, which transforms wood pulp into cellulosic fibers with high resource efficiency and low environmental impact as it recycles process water and reuses the solvent at a recovery rate of more than 99%.

*Naturally soft and smooth almost soothing cool feeling on the skin.*

Rustic Tencel™ 100% lyocell LF
