Ice Cotton - So Comfortably Cool

Cool yourself down, ecologically - literally, with this fabric you can do!

The beauty of this unique “cooling” material lays in the usage of the advanced technology yarn construction unique to Spoerry.

No synthetic fibers are employed - the whole concept relays on the usage of naturally grown and selected cotton and of course to the exclusive, edge of technology yarn producing process unique to Spoerry.

Spoerry ICE COTTON is the functional and ecological yarn for exclusive textile creations with special properties:

- “cool to the touch” effect
- free from harmful allergenic chemicals
- positive contribution to the ecological balance
- natural silken sheen
- perfect yarn structure
- clear weave pattern
- easy care

wet	2	-
Colour fastness to the light		
white/pastel		3/4
medium/dark		4

WASHING INSTRUCTIONS

Wash delicately in lukewarm water 30 °C for 10 minutes with neutral soap.
In case of striped knitwear, add specific sequestering agent in the water and garments must be very well rinsed after washing and dried immediately.

FINISHING

Light washing in lukewarm water helps to settle knitted stitch.

KNITTING ADVICES

In case of long periods of warehouse stocks of the yarns, it's good rule to re-wax them, rewinding *completely* the cones.

We recommend to use feeders with LFA yarn control when knitting this yarn.

Do not use cone with different diameters and don't knit the inner part of cone with the outer part.

INTERNATIONAL SYMBOLS

OUR YARNS AND ENTIRE PRODUCTION CYCLE COMPLY WITH EC DIRECTIVE 92/880

Oekotex regulation compliance: YES

REACH regulation compliance: YES

GB18401 regulation compliance: YES

Stripes/intarsia end use: ask for special application of fixing agent when ordering yarn.

BISFA Mercantile weight: U%= 8.5
